This newsletter is for readers

-who believe that excellent health and wealth is achievable for everyone,

-who are seeking for neutral and critical information regarding health, nutrition, lifestyle and environment,

-who are concerned about the ongoing environmental destruction and our children's future.

Dear Friends,

I am back from a 14 day journey to Germany. I participated in several Bio-Energy Therapy workshops and it was really worth it to know about the newest research, devices and practical applications.

Due to our participation on the Natural Therapy Expo (see page 4) we prepared this Edition as a "Special-Expo-Edition" with many information about Bio-Energy-Therapy. This therapy opens up new perspectives for people interested in Alternative Medicine. The Bio-Energy devices can be used easily by laypeople to treat themselves, their family and friends.

And for professionals it opens an amazing wide range of additional applications. It can be integrated in almost all healing modalities or it can be used by itself.

We start also with seminars and workshops regularly in Brisbane for everyone interested in Vibrational Medicine and Nutrition.

You are very welcome to visit us at the Fair, stand 34. If there are any questions regarding this articles, please don't hesitate and give us a call.

Lots of Love and Harmony,

Vibrational Medicine - A new approach

Illness and its physical symptoms are normally treated like an enemy, poisoned, radiated and removed. But every illness is a part of our path. We have the choice to understand the message behind it and to solve the disharmonies on a spiritual, emotional and finally physical level.

Everyone of us has been ill some time in our life. As children we suffered from a cold, had a toothache, we had our children's diseases like mumps or had German measles. A child becomes resistant after going through an illness and also grows on it. Not only children but also adults grow with each illness, depending on our ongoing life topics. Unfortunately most Western medical approaches do not recognize the lesson behind an illness, rather they treat it like an enemy, like a local defect in our body. This local defect then is poisoned, radiated and removed. This orthodox medical approach is thereby

independent of the symptoms' causes. On the other hand, the alternative approach considers the illness as a result of ongoing emotional disharmonies which are reflected in the physical body. Any feeling manifests itself in our body; our body is virtually the mirror of our soul. Vibrational Medicine is based on this approach and is additionally recognizing that our body is the best healer and needs therefore be supported and strengthened. Vibrational Medicine provides furthermore information to our immune system and essential organs to detoxify and optimize the body functions. Illnesses are always messages helping us to understand the deeper purpose in our earthly-life. The more intensively we work on and with this message, the more we try to understand the deeper meaning and take the right actions for our life path, the quicker we are able to regain our physical, emotional and spiritual health. Vibrational Medicine takes up exactly this principle and integrates it consistently into the treatment of the patient.

Why Vibrational Medicine is so successful ?

We are only believing what we can touch and see. Vibrational Medicine is scientifically not explicable, but nevertheless it works and shows excellent results.

What the bleep is Quantum physics?

“All mater is merely energy condensed to a slow vibration”

Vibrational Medicine is a holistic treatment which considers mind, body and spirit as an integrated whole, and does not consider that they can be treated as separate. In general Vibrational Medicine is hard for most people to accept because it is based on upon acceptance of the human subtle energetic anatomy. In addition, the ability to radionically transmit healing energy or informational vibrations over great distances is a concept that hardly fits into our materialistic based beliefs. To make the effects of Subtle Energetic Technologies more understandable I would like to introduce some of the following hypotheses:

1. Every living thing is made of and consumes life energy (chi, prana, orgon, bio-energy).
2. Quantum Physics shows that all matter is merely energy condensed to a slow vibration. Human beings are also vibrating, everyone with his own individual frequency. Our organs, our cells, all physical or mental disorders are vibrating with characteristic frequencies.
3. There are subtle fields of energy around

the physical human body, just beyond normal perception. Any source of illness starts within our body's subtle energy fields, before it manifests in our physical body.

4. Humans healthy energetic state is always bipolar. Any disturbance of this subtle balance leads to mental or physical disorder.
5. According to the holographic principle, each piece taken from the hologram contains the information of the whole. From a vibrational and energetic viewpoint this means that a small portion removed from the whole, i.e. a drop of blood removed from the body, reflects the total energetic structure of the entire organism.
6. Bioresonance: It is based on the fact that two points enter in resonance if they have the same frequency, like two tuning forks with the same tone pitches C and C. If you activate one fork, the other one resonates in an instant. The same happens with our body: If we radiate our body with a certain frequency i.e. “pain in large intestine: 6-6-9-10-4-8” and our large intestine needs this specific vibrational information, then it will resonate with it. In this case, a healthy large intestine wouldn't pick up this informational vibration. Like two tuning forks with different tone pitches C and H. They never resonate with each other.
7. Water records information. Much like a blank CD.

The daily work with the Medea 7 Bio-Energy Devices

Medea 7 Bio-Energy Devices are easy to use and highly effective. This healing tool is based on over 40 years research. It is currently used by thousands of practitioners and laypeople in Germany.

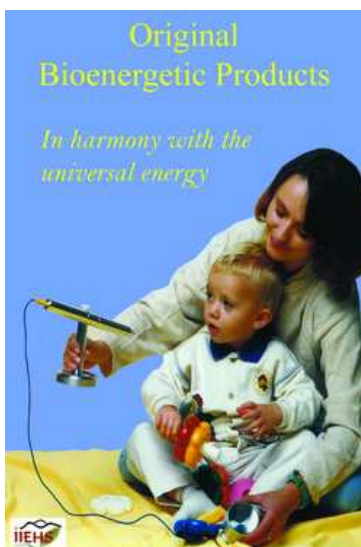

Fortunately we don't need to understand all the principles about Quantum Physics to apply the Medea 7 Bio-Energy devices. They are very user friendly and everyone can heal with them. Approximately 90 % of the users in Germany are not therapists and are very successfully treating their family and friends. Medea 7 Bio-Energy devices were developed by the German Scientist and Healer Arno Herbert. He started his intense research (based on Wilhelm Reich's discoveries) from 1965 on in Norway and later in Germany he developed for the first time highly effective devices which everyone could use. It took him almost 20 years to develop the classical Bio-Energy-Emitter (original: Orgon

Strahler) which was commercialised from 1985 onwards. It is interesting to note that this model has not changed until today due to its excellent performance and popularity. Most therapies can be done with the Bio-Energy-Emitter. The practical work consists of basically the following steps:

1. Definition of the problem/searching for the causes

At first it is very helpful to define the goal of the treatment. This is very similar to other healing modalities. I go a bit further and try to find out which of the symptoms are related to each other and which one is the root symptom.

Sometimes it is favourable to do a complete Vibrational Health Assessment (VHA). A VHA is very helpful to find out the cause of the symptoms. This may be interesting in cases of infection, allergies, negative

The Bio-Energy Emitter can be applied even by non-practitioner very easily and effectively.

environments, or to eliminate psychological patterns like self blockages, miasms and other patterns. VHAs are performed by dowsing. Dowsing plays an important role, but it is not essential to work with the Bio-Energy-Devices. But knowing dowsing opens up far more possibilities.

2. Producing and storing of the vibrations

As mentioned above, all matter is vibrating, like i.e. the Australian bush flower One-Sided Bottlebrush. The numerical frequency for this plant is 8,5-8-2-4-4-3-5. That means this rate is as efficient as the vibrations of the original plant! This numerical code represents the original vibration of the healthy plant without any disturbances. With a specific Vibration Generator we are able to store this vibrational rate of this plant in 0,9 % salt-water ampoules. There are actually more than 20.000 vibrations tabulated of plants, crystals, nosodes and illnesses. Furthermore, we can produce the numerical code of everything, like emotions or even affirmations. With this knowledge it is possible to work out personalized rates for everyone and every type of illness. It is possible to use rates to energise organs, or contra rates in cases of bacteria or viruses. We can also choose harmonizing rates in cases of infections, or rates to detoxify in cases of heavy metal contamination. In some cases it may be enough to work with 5 to 10 rates, in other cases we have to work with thousands of them. After producing the specific combination of rates (numerical codes) the rates are stored in 0,9 % salt-water ampoules. One ampoule can store hundreds of rates for years.

3. Treatment

For treatment the vibrations of the ampoule can be used to irradiate directly the patients'

body or his picture or hair in case of absence. It is also possible to irradiate the healing information into certain transmitters like water, globules, teas, oils, crystals and so on. Afterwards we can use them internally or externally. In case of teeth problems I sometimes radiate healing rates onto the toothpaste to have the best effect on the teeth. But there are many more possibilities using transmitters like sputum, blood, urine, faeces, parts of the skin, earwax, eye secretion and so on. In cases of blood diseases I choose blood on blood, with or without additional rates. In kidney or bladder related problems I use urine on urine. There is no need to drink urine, one can take advantage of it very effectively with the Bio-Energy-Emitter. In certain cases it is appropriate to radiate our solar plexus, a certain point of the body (i.e. acupuncture point), a certain area of the body (i.e. chakra), or indirectly through blood, urine, hair and photo. I test the most effective combination with a pendulum.

Conclusions

Here it is, the healing method for everyone and a powerful tool for health-practitioners. This is the answer for people who do not accept anymore the high medical costs. Due to the "manual work" involved with these devices I consider them as the missing link between orthodox medicine and psychic or spiritual healing like i.e. Reiki or Qi Healing. Furthermore I prefer these Bio-Energy devices because of the broad possibilities and very personalised applications. It is possible to produce one's own remedies without additional costs. And most important, there is no wrong medication possible. Due to the bipolarity and the bioresonance principle, these devices can never transmit negative energies.

Successful results all over the world

Can you imagine being a successful healer without years of cost intensive training? Thousands of users took already their families health into their own hands with amazing results. The most striking cases and new research are discussed in the yearly Bio-Energy Congress in Colmberg (Germany) which leads to a book every year (since 1992).

Multiple Sclerosis

Edith (38) from Germany had been suffering from multiple sclerosis for 11 years. She was given up from orthodox medicine and sent home to die, unable to move and completely dependent on her mother. A friend recommended her to start Bio-Energy Treatments 7 years ago. With an own equipment she treated her daughter daily and

she achieved amazing improvements. Today her daughter is starting walking again, able to read and talk.

Healed from dyslexia

Sven (11) from Namibia had dyslexia. For the treatment he was mainly treated against an allergy to red, yellow and orange-coloured pigments, thickening agents and amalgam. In addition, special rates were radiated for pancreas. All the food was tested before consumption for more than 6 months. After 9 months Sven was capable to read secure and normal again.

Attention Deficit Hyperactive Disorder

Lars (7) from Germany could concentrate no longer correctly and was not receptive during

Continued from page 3

the school-lessons. His concentration and Stamina was low. His school performance dropped strongly. He was treated with more than 60 different rates for "brain optimization, against fears and for the promotion of the attention". After 5 months, his behaviour improved and his performance in school got better. He also grew more self-confident and his stutter-problem improved significantly.

"After 5 months, his behaviour improved and his performance in school got better".

Healed from Insomnia

John (43) from Australia suffered with very strong insomnia-problems approximately a year ago. For weeks, he could not fall asleep. All good meant suggestions did not help. Due to his sleep deficit he suffered lack of concentration and became aggressive. He started taking drugs that his doctor recommended for a certain period. After weeks he couldn't sleep without drugs anymore and he was on the way to get drug dependent. With the help of the Bio-Energy therapy he was able to sleep better already after a few days. After approximately two weeks he was able to sleep without any drugs.

Recovered from Schizophrenia

Michael (37) from Germany was suffering from age 26 of schizophrenia. After several stays in psychiatric hospitals, under strong medications he lost all his work and friends. Nobody was able to help him. 5 Years ago he was treated regularly with Bio-Energy distance treatments with permanently personalized frequencies. He improved slowly but constantly every year. Two years ago he stopped taking drugs and now he is able to work part time. More and more days, he is feeling completely free of symptoms.

Release from Pain in Terminal Cancer

Stefan (31) from Germany suffered from an aggressive malignant brain tumor. After an odyssey of 8 months with one operation and a series of chemotherapy treatments, he was sent home to die. When the Bio-Energy-Treatment started his oral mucosa was completely infected, he was fed only liquid food. He was treated with personalized frequencies during 3 months until he died. Although the Bio-Energy-Therapy started too late, when his health state was already irrevocably damaged, he didn't suffer any pain during his last months, which was unexplainable for his doctors.

IIEHS News & Activities

- ◆ Our new Online Shop is available now: www.creating-harmony.com
- ◆ We are participating in the 4th annual Brisbane Natural Therapies & Natural Health Expo 29 - 30.04.2006. We invite you to visit us at stand number 34. We will expose and sell exclusively Bio-Energy and Radionic devices. Have a look in: www.naturaltherapyexpo.com.au

IIEHS Seminars and Training

- ◆ **"Dowsing I for health, healing and environment"** (www.environment-health-solutions.com/seminar-dowsing-basic.htm)
03. June 2006; Brisbane; venue to be posted soon; Enrolment until 24. May 06; >> places still available <<
- ◆ **"Healthy Nutrition and Lifestyle"** (www.environment-health-solutions.com/seminar-nutritionlife-basic.htm)
10. June 2006; Brisbane; venue to be posted soon; Enrolment until 31. May 06; >> places still available <<
